DEVELOPING A COMPLIANCE VERIFICATION PROGRAM

September 21, 2010 • 11:00 a.m. Eastern Time • Course Length - One Hour.

Instructor: John Kinnear, IBM

Compliance verification is one of the required elements in the ANSI/ESD S20.20 standard. Without periodic verification of the ESD materials used within an Electrostatic Protected Area (EPA) programs can degrade over time. This course will cover some of the items that need to be considered for a successful compliance verification program.

Topics covered in this program include,

- What is a compliance verification program?
- What is the difference between product qualification and compliance verification?
- How does the ESD program manager determine the frequency of testing?

As part of the course, common ESD control items will be covered and how to do the testing efficiently and to meet the requirements of ANSI/ESD S20.20 and TR53. Questions can be submitted in advance to be answered as part of the course. email your questions to info@esda.org, please specify "online compliance verification question" in the subject line.

ABOUT THE INSTRUCTOR

John Kinnear is an IBM Senior Engineer specializing in process & system technology, and facility certification in accordance with ANSI/ESD S20.20. John is well known globally for his technical contributions to national and international standards. He has been the ESD Site Coordinator for IBM's Poughkeepsie site since 1989. He is the past chairman of the IBM Inter-divisional Technical Liaison Committee for ESD Protection and is an important member of his company's committee to develop and implement the ESD corporate program for IBM.

As a member of the ESD Association since 1990, John has served in several Standards Development Committees as well as association management positions. John is the appointed Technical Adviser to the United States National Committee/IEC Technical Committee 101, where he represents the United States to the International Electrotechnical Commission (IEC). In this position he assisted in the evolution of international ESD standards and supports international adoption of ANSI/ESD S20.20.

As Chair of the ESDA's Facility Certification (ANSI/ESD S20.20) development program, John played major roles in the program's development and industry launch. In particular, John coordinated the initial development of Lead Assessor training, ISO Registrar Certification and witness audits.

John has served in every ESD Association officer's position, including Vice President, Senior Vice President and President. He is past Chairman of the EOS/ESD Symposium Technical Program Committee and past General Chairman of the 2004 EOS/ESD Symposium. In September 2006, John was presented with the Outstanding Contribution Award for his contributions to the ESD Association.

Equipment Requirements

This course uses a multi-way audio broadcast over the Internet. You will need a soundcard and speakers (a headset is recommended) installed to hear the presenter during the course.

Attendees can send questions to the presenter via text chat, other interaction is not available.
