

ESD on Campus Program

Thammasat University

Bangkok, Thailand

Steven H. Voldman

ESD Association Board of Directors

Sawatdee krab !

Thammasat University is one of the prominent engineering universities in Thailand today. The university is named in the Thai language (e.g. pasa Thai), 'Thammasat Lae Karn Muang' which means, 'The University of Moral Science and Politics'. Thammasat University was inaugurated on June 27, 1934. Thammasat U is a large university with both engineering programs in English and Thai. The Sirindhorn International Institute of Technology (SIIT) teaches courses in electrical engineering as well as provides a proficiency in English.

The host for the ESD on Campus lecture was Professor Wanchai Pijitrojana. Thammasat University was quiet except for graduate students working away in the EE department laboratories. Electrical engineering students, faculty and outside industrial people attended the university lecture. Attendees from other Thailand universities also were present to hear how ESD influenced their industry from robotics, tooling, to magnetic recording industry.

Dr. Steven Voldman, IEEE Fellow

ESD on Campus Program Manager

ESD Association Board of Director
