2027 | SECOND ANNUAL EVENT

Standards Technical Summit

Shaping the Future of ESD & Reliability Standards

2027 EVENT DETAILS

September 23, 2027 | Riverside Convention Center | Riverside, CA

The Next Conversation Starts Here

Building on the inaugural Standards Technical Summit, this strategic forum brings together technology leaders, standards developers, reliability experts, and innovators to identify the priorities that will shape the next generation of ESD and reliability standards.

Why Participate?

- Influence standards priorities in response to real-world industry needs
- Explore emerging challenges in advanced packaging, AI hardware, automotive electronics, and new materials
- Connect across industries and standards organizations
- Help turn strategic ideas into technical initiatives and collaborative action

Who Should Attend?

Corporate technology leaders • Engineering directors • Reliability managers • Semiconductor and advanced packaging experts • Automotive electronics leaders • Standards organization representatives • Industry visionaries

Help Shape What Comes Next
