

EOS/ESD Association, Inc.

ESD Program Associate Certification

Your First Step Toward ESD Control Expertise

Take the next step in your ESD education with the ESD Program Associate Certification from EOS/ESD Association, Inc.

Through three comprehensive courses and a knowledge assessment, participants will explore ESD fundamentals, compliance verification measurements, auditing techniques, and the key elements of developing an ESD control program based on ANSI/ESD S20.20.

What Does the Certification Include?

The certification program includes three courses:

FC100: ESD Basics

Establish a foundation in electrostatics, ESD failure mechanisms, device sensitivity, and essential control practices.

FC101: How To's of In-Plant ESD Auditing and Evaluation Measurements

Explore compliance verification, measurement techniques, auditing practices, and common pitfalls that can affect ESD control program effectiveness.

PRMAFC340: ESD Control Program Development to ANSI/ESD S20.20

Learn the essential elements of designing, implementing, and maintaining an ESD control program based on industry standards.

Upon completion of the ESD Program Associate Certification, participants will be able to:

- Understand fundamental ESD principles, risks, and control methods.
- Identify essential elements of an effective ESD control program.
- Apply basic ESD auditing and compliance verification techniques.
- Understand key requirements of ANSI/ESD S20.20.
- Support the development, implementation, and maintenance of an ESD control program.

COURSE SCHEDULE:

Friday February 26, 2027

FC100: ESD Basics

Saturday February 27, 2027

FC101: How To's of In-Plant ESD Auditing and Evaluation Measurements

Sunday February 28, 2027

PRMAFC340: ESD Control Program Development to ANSI/ESD S20.20

+

CERTIFICATION EXAMINATION

Costs:

Full Certification - \$1,950

Register for one course (no certification) - \$800
