

## Call for abstracts

### Electrostatics 2023

4-7 September 2023

Brunel University, Uxbridge, UK

Electrostatics 2023 is organised by the Dielectrics & Electrostatics Group (D&E) of the Institute of Physics (IOP) and continues the International Conference series on Electrostatics which takes place in the United Kingdom every four years. The 2023 conference will be held at Brunel University London, which has a history that can be traced back to 1798 and is located very close to Heathrow airport and central London.

The conference is also co-sponsored by IOP Printing and Graphics Science Group and IOP Computational Physics Group and co-partnered by IOP Plasma Physics.

The Electrostatics conference series was started with a desire to understand the fundamentals of electrostatic charging, and to explain and control electrostatic phenomena found in industry. There is still much research in these areas, which always form a welcome part of the conference. Electrostatic phenomena in our environment and in environments beyond our planet are the subjects of fascinating and globally important research. The application of electrostatics in the development of new materials and new methods of fabrication is equally exciting. So too are the many applications in biology and medicine, environmental and agricultural protection and energy generation.

Electrostatics 2023 will provide the perfect forum for scientists, engineers, researchers and students from around the world to meet and discuss advances in all these areas. Whether professor or student, industry leader or factory engineer, Electrostatics 2023 warmly welcomes all.

Contributions for oral and poster presentations are invited. Abstracts should be a maximum of 500 words.

### Key Dates:

Abstract Submission Deadline: 28 April 2023

Paper Submission Deadline: 7 July 2023

Early Registration Deadline: 28 July 2023

Registration Deadline: 25 August 2023

**SUBMIT ABSTRACT**
